

## A Small Demonstration...

God sent a small virus from China and turned it loose on the world. Kapow! Look at the world now! The world is knocked off its rocker. This virus and its threat has changed everything.

Those wise politicians and so-called scientists who claim to be able to control global warming are knocked off their high seats. They can't control anything!

First of all God is always good! God is love! God is always motivated by His desire to save mankind from self-destruction through the blood and sacrifice of Jesus Christ our Lord and God's Son! Does He have a way of getting our attention? I think so! Can He start viruses? Yes! Can He stop viruses? Yes!

I am so glad to be on God's side. I am so glad to be called according to His purpose. I'm so glad to be a Christian believer in God and His plan and His purpose.

Because you and I believe God and trust the truth of His word. Look with me at one small passage. In Ephesians chapter one where Paul told us to have the *"eyes of our heart enlightened"* so we can know the hope to which God has called us. He ends that chapter by saying, *"And He (talking about God) put all things under His feet (Jesus' feet) and gave Him as head over all things to the church, which is His body, the fullness of Him who fill all in all."*

There is good news for us here! This is just a very small demonstration of God's power. He could make the sun explode if He wanted to.

I am persuaded that many of us go to assembly with the eyes of our heart shaded and dulled by life. We sing our songs. We eat our crackers and drink our grape juice, and then we go home as if nothing very much happened.

What just happened is that we have just been in the very presence of the awesome God who controls viruses as He keeps the moon in its place.

Have we lost the ability to be thrilled at the closeness of God's presence? Do we dully discuss the trends of dressing casually or dressing up for worship?

Wake up! We are His people and this power demonstrated is for us who serve in the Lord's Kingdom.

Maybe being kicked out of our comfortable building will be good for us to help us realize what is important! The one we are assembling for in different homes to worship! He is what it is all about!
